Gradient System

Gradients are used as subtle accents, never as primary UI elements.

Rotating Conic Gradient

Used for orbital icon borders. Spins at 4s per revolution.

CSS: conic-gradient(#00DC82, #32B4FF, #9C6ADE, #E040FB, #FF69B4, #FF7B6B, #FF8C42, #FFD43B, #00DC82)

animation: spin 4s linear infinite

Gooey Blob Transition

CSS filter: blur(30px) contrast(8) creates organic metaball merging.

Each blob has a unique gradient color as box-shadow glow.

Blobs grow from bottom on scroll, consuming the white hero.

Gradient Line

1px height. Used for subtle section separators. Opacity: var(--gradient-opacity).

Gradient Dot

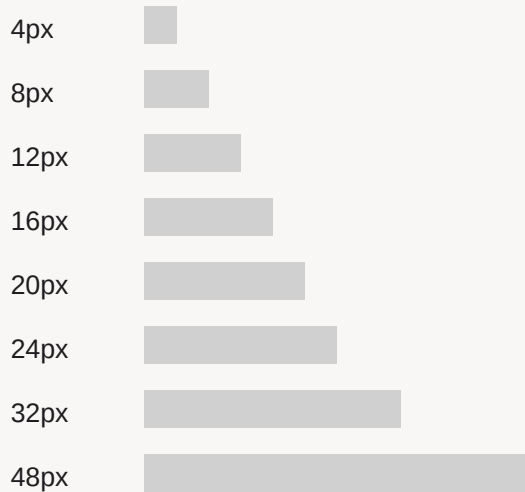

8px diameter. Animated spin 3s. Used as status indicators.

06

Spacing & Radius

Spacing Scale

Border Radius

4px	Small inputs, tags
8px	Buttons, inputs
